

ALTEK

ENVIRONMENT AND OCCUPATIONAL HEALTH SAFETY POLICY

As ALTEK DÖKÜM INC., in addition to seeing human beings as our most important value, conducting activities that respect the environment and provide continuous development are also among our main corporate values.

To this end, we undertake to work together with all our employees in order to realize the following principles.

- To comply with the legislation and standards related to Environmental and Occupational Health and Safety.
- Minimize the impacts that leads to environmental pollution and eliminate them, if possible.
- To work towards reducing our wastes, to turn towards the material and production technologies that provide recovery, if possible, to dispose our non-recoverable wastes.
- To take all necessary measures to protect our employees from all kinds of occupational accidents and occupational diseases.
- To use the energy and natural resources efficiently.
- To identify all risks that arise as a result of our operations and try to reduce these risks to an acceptable level.
- To train our employees in order to implement our Environment, Occupational Health and Safety Management Systems effectively.
- To review and improve the system and activities we establish constantly and keep open to the public and interested parties auditing when requested.
